

Join Your Cruise's Facebook Group

A simple pre-cruise step that can add helpful tips, community, and extra fun before embarkation.

Advisor Note

This guide is general travel guidance. Always verify booking-specific details, document requirements, schedules, policies, and pricing with your cruise line or travel advisor.

How to Find It

Before your cruise, search Facebook for a group created specifically for your sailing. These groups are usually named with the ship and departure date, such as: Ship Name - Sailing Date.

What Travelers Often Share

- Port and excursion ideas.
- Hotel recommendations and transportation options.
- Dining, entertainment, and theme-night updates.
- Cruise line announcements and packing suggestions.
- Questions from other travelers and tips from experienced cruisers.

Optional Group Activities

Some sailing groups organize optional activities. Participation is completely optional, but these extras can be a fun way to meet people and add something memorable to your cruise.

- Meet-and-greets.
- Cabin crawls.
- Slot pulls.
- Gift exchanges or Secret Santa events.
- Group excursions and sail-away gatherings.

Use Good Judgment

Facebook groups are helpful, but they are not official cruise line resources. Information from other travelers may be incomplete, outdated, or incorrect.

Always verify important details through the cruise line or your travel advisor, especially documentation, boarding requirements, itinerary changes, and cruise line policies.

Do Not Share Publicly

- Your full reservation number.

- Your cabin number.
- Travel document details.
- Your home address.
- Exact dates your home will be unattended.

Cozy Tip

Join the group for ideas and community, but rely on your cruise line and travel advisor for information that could affect your vacation.

Memory Moment

A cruise can begin long before embarkation day. Sometimes the first memories are made while chatting with fellow travelers, planning a gift exchange, or recognizing a familiar face when you finally step onboard.
